EXPERIENCE

- **WEB DEVELOPMENT AND DESIGNING : OASIS INFOBYTE** Remote
Frontend Developer (Internship) July 2023 - Aug 2023
 - : During my internship, I focused on improving User Interface (UI) design, prioritizing usability and accessibility.
 - : Integrated code coverage analysis into our test strategy, resulting in a 40 percent reduction in software bugs and improved overall product quality.
 - : I worked on real-world projects, refining features and strategies. This experience has prepared me for a career in web development or design.

PROJECTS

- **Disney Plus Clone [Link]** June 2023 - July 2023
 - : User Interface Design : The front-end of the web app is responsible for providing a seamless and responsive user experience, and communicating with the back-end to retrieve and display data. This involves selecting the appropriate front-end technologies and frameworks, such as React.js, Redux, and Styled-components.
 - : Data Storage : Seamlessly integrated real-time data storage and authentication, forging a user experience that mirrored the enchantment of the original platform.
- **LinkedIn React App [Link]** May 2023 - June 2023
 - : Dynamic User Experience : Crafted an interactive LinkedIn React app, harnessing the power of React.js and Firebase. Enabled seamless real-time data storage and authentication for a dynamic user experience.
 - : Google Authentication : Implemented a robust Google authentication system that ensured secure login and logout processes, enhancing user account security within the app.
 - : Engaging Content Sharing : Leveraged Firebase's capabilities to facilitate content sharing. Empowered users to create captivating posts enriched with images and videos of recruiting, elevating their content sharing journey within the application.
